ATC
CAST • CATCH • CONQUER

Introduction

In 2001, ATC as a mid-range premium fishing tackle brand, crafted to meet the needs of increasingly sophisticated anglers. We strived to build the best of fishing tackle that were engineered to perform optimally at an affordable price, without compromising on the quality of the components or workmanship.

Fifteen years on, ATC has expanded its product range to include premium mid-range fishing reels that feature design and construction elements, often found in high end reels. A stringent manufacturing process combined with precise calculation and high quality materials ensure that the reels are built both tough and smooth.

An accompanying range of accessories that include jigs, tackle cases and apparel are also available to enhance your angling experience with ATC, as you embark on your angling journey to cast, catch and conquer.

KRAVEN

The ATC KRAVEN was developed as a true 100 sized baitcaster that is built for saltwater usage. Constructed with an extremely strong graphite composite frame and precision engineered aluminium internals, as well as the CNC aluminium drive gear, the KRAVEN is practically made to withstand and perform in the harsh and corrosive saltwater environment. The spool and handle are also crafted from CNC Aluminium which also provides a high level of corrosion resistance and durability while keeping it lightweight, while the full EVA knobs provide control and comfort when handling. Its 6+1 stainless steel ball bearings also offer an overall smooth cranking experience, and provides easy distance on the cast. The Kraven features a 7kg drag pressure, which makes it perfect for 10-30lb braid / PE lines that is paired with a Medium to Heavy outfit. It is available in 6.6:1 and 8.1:1 gear ratios.

Features

- High-strength Graphite Frame And Side Plates
- CNC Precision Crafted Aluminium Gears, Spool And Handle
- 7kg Drag Pressure
- Easy Cast Magnetic Braking System

MODEL	RATIO	LINE CAPACITY	BALL BEARING	DRAG RANGE	WEIGHT

Jigging Handle With Power Knob

"Open-Frame V Shaped" Line Guide

COMBAT V2

Maintaining its superior built that combats the toughest fighting predatory species, the ATC Combat V2 is upgraded. Featuring an open-frame 'V' shaped line guide that reduces resistance of the line at high drag, and increasing casting distance. Fitted with a more robust brass material for its gears, and maintaining its corrosion resistant aluminium frame and side plate, as well as the multi-disc drag system that has a drag range of 10-12kg depending on the spool used. It includes two lightweight aluminium spools in both shallow and deep capacity and a magnetic braking system, which ensures a consistency in casting distance and accuracy. The 10+1 ball bearings system further enhances the reel's all-round smoothness. Also includes a power handle for offshore usage.

Features

- Corrosion resistant aluminium body and side cover
- Up to 12kg drag force
- Improved line guide: "Open-Frame V Shaped" line guide for smoother drag and casting
- Enhanced magnetic braking system
- Super robust brass alloy material main gear and pinion gear
- Multi disc drag system with carbon washers
- 10+1 Stainless Steel Ball bearing System
- Shallow Spool for long cast included
- Power Handle for offshore usage included

Jigging Handle With Power Knob

COMBAT PLUS

The ATC Combat Plus is built to take on some of the toughest fighting predatory species. Featuring a corrosion resistant aluminium frame and side plate, the Combat plus is equipped with a multi disc drag system that has a drag range of 10-12kg. A lightweight aluminium spool and a magnetic braking system ensure consistency in distance and accuracy with every cast. The 10 + 1 ball bearing system further enhances the reel's all- round smoothness. Comes with a spare ultra-long cast shallow spool and jigging handle for all round application.

Features

- Corrosion Resistant Aluminum Body & Side Cover
- Light Weight Aluminum Spool
- Multi-Disc Drag System
- 10+1 Ball Bearing System
- Ergonomic EVA Knobs
- Jigging Handle With Power Knob Included
- Long Cast Spool Included

COMBAT CF BFS

The ATC Combat CF is ATC's newest light bait casting reel. Weighing in at 160g, the ATC Combat CF features an open frame 'V' shaped line guide for smoother drag and enhance casting distance. It includes two ultra-lightweight spools for Bait Finesse and a standard spool for medium-medium heavy rods. Constructed with a carbon fiber body and handle, the ATC Combat CF is equipped with an ultra-smooth multi disc drag system that provides up to 5kg of drag force, and an enhanced magnetic braking system for optimum casts. The 9+1 stainless steel ball bearing system further enhances the reel for a super smooth cranking and all-round smoothness to the reel's performance.

Features

- Carbon fibre body and handle
- Up to 5kg drag force
- Drag Clicker
- Improved line guide:"Open-Frame V Shape" line guide for smoother drag and casting
- Enhanced magnetic braking system
- Multi disc drag system
- 9+1 Stainless Steel Ball Bearing System
- Bait Finesse System Spool Included
- Standard Spool included

COMBAT 100/101

The ATC Combat 100/101 is ATC's newest bait caster, built with a perfect balance between lightweight and power. Weighing in at 180g, the ATC Combat 100/101 is built with a ultralight aluminium frame and body, and includes a super lightweight aluminium spool with a deep capacity, allowing usage in both fresh and saltwater. It features an ultra smooth multi-disc drag system that provides up to 9kg of drag force and a 9+1 stainless steel ball bearing system for super smooth cranking and all round smoothness to the reels performance.

Features

- Super Lightweight Aluminium Spool With Deep Capacity
- Ultra Lightweight Aluminium Body
- 9+1 Stainless Steel Ball Bearing
- 7.3+1 Gear Ratio
- Max Drag Up To 9kg
- Suitable For Use In Both Fresh And Saltwater

CNC Aluminum Spool

Hybrid Ceramic Cast Bearings

VULTURE 80/81

The Vulture is ATC's newest low profiled baticasting reel. Available in both left and right retrieves, the Vulture's main body is constructed with T6061 aircraft grade aluminium and a fibreglass composite material, and is designed with maximum performance and function in mind. Internally, it features a hyper forged copper alloy main gear that provides extremely smooth cranking design, and a 6kg carbon drag system. Right out of the box, it comes equipped with hybrid ceramic casting bearings which allows the Vulture to achieve unprecedented distances, as well as a carbon swept handle with customised EVA knobs. The Vulture also features the ATC's signature V-Shaped line guide to further aid in casting distance and effiecient drag system. The 7+1 ball bearing gives the overall reel a smooth performance. With a gear ratio of 7.3:1, it is an all round reel that is relatively smaller profiled for an 80 size. Suitably matched with a ML-MH outfit and has decent line capacity of 0.285 / 150m that can be used in both saltwater and freshwater.

Features

- 6KG DRAG PRESSURE
- 1+1 HYBRID CERAMIC CAST BEARINGS
- SIGNATURE ATC V-SHAPED LINE GUIDE
- 7.3:1 GEAR RATIO, TOTAL 7+1 STAINLESS STEEL BALL BEARING
- CARBON SWEPT HANDLE WITH EVA KNOBS
- T6061 AIRCRAFT GRADE ALUMINIUM BODY
- HYPER FORGED COPPER ALLOY MAIN GEAR

CLOUT

The CLOUT, ATC's latest offshore overhead reel, is designed for durability and corrosion resistance. It is made with high-quality T6061 aircraft grade aluminium for its body and handle. Inside, it features hyper-forged brass drive gears, providing powerful and stable cranking performance. The anti-reverse assembly includes a docking system, providing a 100% anti-reverse cranking experience in the harshest conditions. The reel includes an aluminium alloy spool and a smooth carbon drag system, with 8+1 ball bearings ensuring a smooth feel overall.

The CLOUT is available in a high-speed gear ratio for both left and right retrieves. It is suitable for medium jigging outfits and perfect for slow jigging outfits and has good line capacity at PE2-500m.

Features

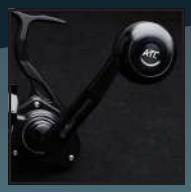

- T6061 AIRCRAFT GRADE BODY AND HANDLE
- HYPER FORGED BRASS GEARS
- 12KG CARBON DRAG SYSTEM
- DOCKING ANTI-REVERSE SYSTEM
- 8+1 STAINLESS STEEL BALL BEARINGS

MODEL	RATIO	LINE CAPACITY	BALL BEARING	MAX DRAG	WEIGHT

VIGILANCE

BIG GAME SPINNING REEL

SW5000/5000H

Incorporating the latest reel technologies, the ATC VIGILANCE is constructed and designed for big game fishing, built to take on monster predators and prolonged saltwater usage. It features a 100% waterproof body, preventing water for entering the gear system and has ATC's super dual drag system which applies pressure from the top and bottom of the spool, providing a powerful and smooth drag. Built with high grade corrosion resistant aluminium body and rotor, and equipped internally with a forged hyper gear to give it a effortless retrieval. The 12+1 stainless steel ball bearings adds an all-round smooth feel to the reel.

Features

- 100% Waterproof body
- 12+1 Stainless Steel Ball Bearing
- Dual Drag System
- High Grade CNC Corrosion Resistant 6061-T6 Aircraft Grade Aluminium Body and Rotor

VIGILANCE

BIG GAME SPINNING REEL

SW3000/3000H

The smaller of the ATC VIGILANCE series of reels for lighter tackle usage. Proven with its bigger counterparts, the VIGILANCE 3000 retains its construction with the high quality full 6061-T6 aircraft grade aluminium that is used on the body and rotor that makes it extremely corrosion resistant, as well as the double anodised spool. The signature ATC dual drag system is also a key feature in the VIGILANCE 3000 models that provide a powerful and smooth drag, and is equipped internally with a forged hyper brass gear for extreme performance and a smooth retrieve. The 10+1 stainless steel ball bearings adds an all round smoothness and increased performance when using this high end salt water spinning reel. Available in normal and high speed retrieval ratios.

Features

- Signature ATC Dual Drag System
- Constructed with High Grade 6061-T6 Aircraft Grade Aluminium
- Forged Hyper Brass Gear on pinion and drive gears
- Mechanical Anti Reverse System
- Double Anodised Spool
- Extreme corrosion resistance for saltwater usage
- Machined aluminium on handle and knob

VIRTUOUS

The ATC Virtuous incorporate some of the latest technology built to take on the toughest fighting predatory species and prolonged usage. Featuring a dual drag system which applies pressure from both the top and bottom of the spool for a more powerful but smooth drag when going against monsters. Constructed with aluminum body, rotor and spool which is renowned to be light yet tough enough to withstand prolonged saltwater usage. Internally, an oscillating gear system works in tandem with a main gear made of zinc alloy and a pinion gear made of brass. The screw on handle with an EVA knob fits perfectly with the patented Multi Point Anti-Reverse System that limits backward handle movement for better hooksets while reducing shock to the reel. The 9+1 Stainless Steel corrosion resistant ball bearings add an all-round smooth feel to this tough reel.

Features

- Aluminium Body and Rotor
- Aluminium Spool
- 9+1 Stainless Steel Ball Bearing
- Ergonomic EVA Knob
- Dual Drag System
- Multi Point Anti-Reverse System

Jig

CHASER JIG ✱

ATC chaser was designed with slim but perfectly balance profile that provide fast sinking abilities. Attributed to the new weight distribution system, the Chaser flutters and darts when jigged triggering violent strikes. The name was inspired to invoke swift pelagics which habit throughout the entire water column.

Accessories

SALT ALLIANCE TACKLE CASE *

Model: 014-SAB01

- Hydrophobic effect
- Made from heavy duty Polyethylene
- Internal mesh compartment for small items
- Suitable as check-in luggage
- Dimensions: L 45 x W 31 x H 29 cm (40.45 Litres)

SALT ALLIANCE JIG BAG *

Model: 014-SAB02

- Hydrophobic effect
- Ergonomic carrying handle
- Individual jig compartments
- Velcro covers for keeping jigs in place
- Dimensions: L 36 x W 23 x Thk 8 cm (Closed)

SALT ALLIANCE GAFF *

The ATC Salt Alliance gaff features an aircraft-grade extendable aluminium shaft with a stainless steel hook, making it stronger and lighter for easier and more confident fish landings.

Model: 014-GF01

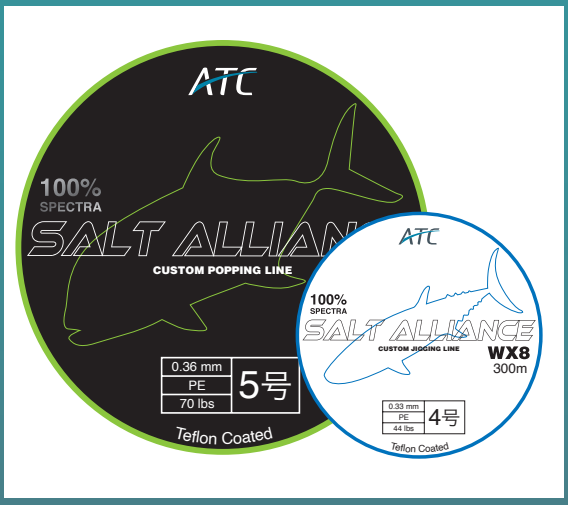

- Stainless steel hook
- Extended length of 24”
- Aircraft-grade aluminium
- Ergonomic non-slip handle
- Collapsible to 10½”
- 12kg / 26 lbs build-in scale
- Wrist lanyard
- Safety cap

SALT ALLIANCE JIGGING / POPPING GLOVE

- Mesh material: 20% spandex / 80% nylon breathable
- Wear resistant construction
- Anti-slip silicone grip pad
- Vented air hole foregrip with reinforced pads
