ABOUT EXECUTE

Veteran anglers probably have used our line at one point or another as we've spent decades manufacturing lines in the shadows for many internationally renowned fishing brands. The time has come to release our very own brand of line that has been made with the industries best practices.

Extensive R&D has been invested into creating lines that meet the stringent standard of the modern angler. By combining the latest line manufacturing processes with our next-generation specially formulated resin coating, EXECUTE brings the finest and unrivalled fishing lines to the world of angling!

#EXECUTELine

UNIVERSAL GRADE BRAIDED LINE

PARADOX

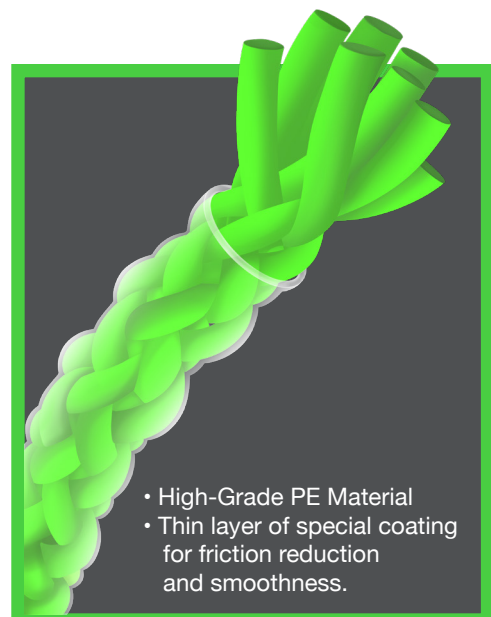

OPTIMIZED FOR SPINNING AND BAITCAST REELS

**ULTRA THIN BRAID LINE • HIGH ABRASION RESISTANCE
SUPERIOR STRENGTH & DURABILITY • 4-WEAVE BRAID LINE**

Made with High-Grade PE material, the EXECUTE PARADOX Braid has been optimised for both spinning and baitcasting reels. Its coating helps the line keep its round shape which dampens the impact of backlashes as the line resists digging in upon itself. Reducing the headache of spending extensive time picking them apart.

Available in X4 & X8 strand braid, its uniquely formulated coating reduces friction and increases abrasive resistance.

Built for strength and smoothness, the EXECUTE PARADOX braid is the most universal line for most fishing applications!

- High-Grade PE Material
- Thin layer of special coating for friction reduction and smoothness.

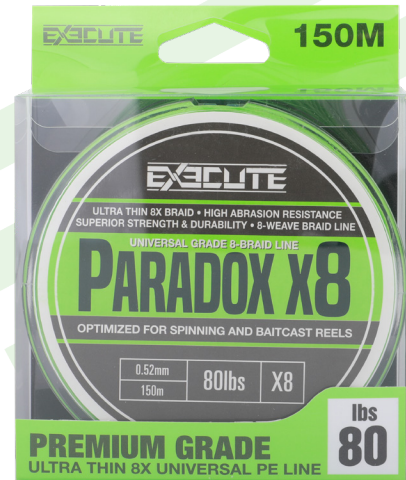

UNIVERSAL GRADE 4-BRAID LINE PARADOX X4

EXTREME ABRASION RESISTANCE COATING

ABRASION

OPTIMIZED PERFORMANCE ON BAITCAST REELS

**ULTRA THIN BRAID LINE • HONEYWELL SPECTRA FIBER
SUPERIOR STRENGTH • UNIVERSAL GRADE BRAIDED LINE**

Made with 100% Honeywell Spectra fibres that is 15 times stronger than steel and is also used in the making of industrial gloves used to protect workers from cut hazards.

As it stands, Spectra fibres last twice as long in abrasion testing compared to other UHMWPE materials because Spectra lines offer less internal friction, resulting in a decrease in frays and increase in line lifespan.

But the secret to its abrasive resistant prowess is that we've coated it with 2 different coatings: Each one of the main strands are coated with a thin Fluoropolymer coat. This first coating has a low viscosity which seeps into and thoroughly coats the Honeywell Spectra fibres, not fusing them but creating ultra thin shield that protects them. This eliminates the ingress of particles which causes damage from the inside and also helps the line cinch down on itself properly, creating strong and lasting knots.

The second external resin coating that is applied after the line has been braided has a low coefficient of friction. We've essentially increased the lines density through this process, reducing the friction experienced upon contact. It will take you longer to abrade as the line has more mass and experiences less transverse & unilateral abrasive forces due to the reduction of friction acting on it.

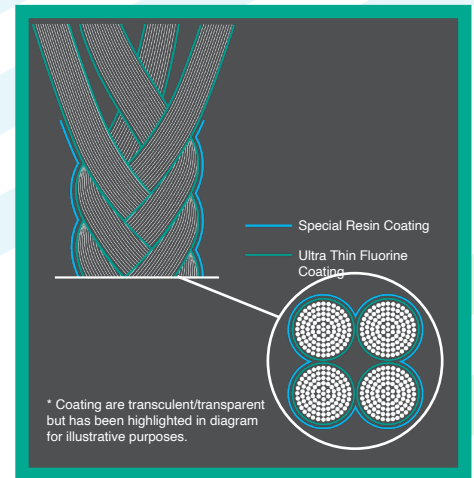

Superior in strength and unparalleled in durability, you have to try it to believe it!

MADE WITH 100% HONEYWELL SPECTRA FIBRE

BIG CAST

ENHANCED FOR BIG GAME TOPWATER CASTING

HIGH DRAG IMPACT • X8 PE BRAID
LOW STRETCH • EXTREME PERFORMANCE & STRENGTH

Made with 100% Honeywell Spectra technology, the EXECUTE BIG CAST X8 Line was designed and enhanced for big game topwater casting. It features a slightly thicker line made with an 8 strand braid, coated with a specially formulated abrasion resistant coating that improves its wear resistance and has a very low stretch, improving hook sets. Built for extreme performance and strength, the heavier rated lines were designed to handle big game popping for GTs and Tuna, and is suitable for use on baitcasters when targeting fish like the Papuan Black Bass. The lighter rated lines are ideal for light casting and popping for Sailfish, Mackerel, and other Pelagic species, and is suitable for general use on baitcasters if required.

SHOCK LEADER MONO

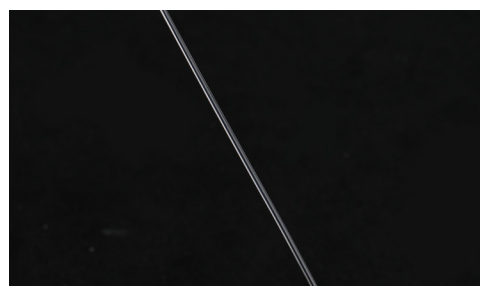

100% MONOFILAMENT MATERIAL SHOCK LEADER MONO

PREMIUM GRADE UNIVERSAL SHOCK LEADER LINE

HIGH ABRASION RESISTANCE • INVISIBLE SUPERIOR SHOCK ABSORPTION • HIGH TENSILE STRENGTH

Made with 100% Monofilament Material, the EXECUTE Shock Leader Mono Line was designed for universal fishing application. It features an almost invisible line underwater, high abrasion resistance, superior shock absorption, and highly tensile in strength. Suitable for usage in almost all fishing applications.

SHOCK LEADER FLUOROCARBON

PREMIUM GRADE UNIVERSAL SHOCK LEADER LINE

**HIGH ABRASION RESISTANCE • INVISIBLE
SUPERIOR SHOCK ABSORPTION • MATERIALS FROM JAPAN**

Made with 100% Fluorocarbon Material, the EXECUTE Standard Shock Leader Line was designed for universal fishing application. It features an almost invisible line underwater, high abrasion resistance, superior shock absorption, and highly tensile in strength. Suitable for usage in almost all fishing applications.
