

CATALOGUE 2025

Proxy 110mm

BULLET

As the name suggests, this lure is designed to cast like a bullet. Its aerodynamic body reduces the air resistance which allows a stable posture when casting, this results in a further casting distance without being affected by the wind. The internal compartment is fitted with stainless steel bearings to create loud commotion as it glides in a zig zag action that will irritate predators to smash it.

BIJOU

Bijou is a "bite-size" crank bait designed with a wider wobbling action. Constructed with tough ABS material to withstand multiple hard strikes, the Bijou proves it worthy in highly pressured waters. A wide wobbling action can be achieved with a simple straight retrieve method, adding occasion twitches in-between mimics the action of a fleeing baitfish.

SAVVY

Constructed with ABS material, the Savvy is a 50mm downsized minnow designed to perform in the toughest fishing condition. Weighing at 3.6grams, the Savvy is centrally balanced to enhance its casting distance. When worked with a straight retrieve, the Savvy creates a tight wobbling action. A twitch and pause method impart a darting action which attracts predators to investigate.

DYNAMITE

Dynamite is versatile popper that excels any time. Designed with a large concave mouth cup to displace water and create exhilarating splashes with each effortless flick of the rod tip. It also has an aerodynamic profile which allows great casting distance and accuracy which allow anglers to cover a vast area in different field conditions. When worked in a slow retrieve, it's 3D eyes and natural light wriggle action resembling a surface cruising juvenile chasing flies will entice any predators to investigate.

BOBBY

The Bobby is a must have for shore casting anglers. It produces a tight wobbling action as it dives during a straight retrieve. The lure is weighted in the front for a forward profile which makes it less prone to snags as the bib knocks into structures and slowing rising on the pause to trigger bites from predators.

JERKIN' SHAD

The Jerkin Shad is a jerk bait balanced perfectly for suspending presentation. It is designed to mimic a fleeing fish action which causes vibration when a tighter darting action is imparted activating the feeding switch of a predator. Together with its realistic 3D eyes and textured translucent body, it projects an ideal profile for lurking predators looking for a quick meal.

WRIGGLING

The Wriggling is a sinking pencil that is built to excel in the toughest fishing conditions. Its internal compartment is precisely fitted with weighted ball bearings to maximise its casting ability and to allow it to sink naturally. When worked with a constant twitching of the rod, the lure performs an irregular action mimicking a baitfish near the surface.

RADIANT

The FishArt Radiant 115mm is a dart minnow that sinks, giving an advantage of fishing various columns of the water. Constructed with ABS plastic for an increased durability and internally equipped with ball bearings, attracting attention of surrounding predators when the lure is worked. With a constant straight retrieve, it has an enticing wide wobble, producing a rattling sound. When the lure is twitched, it darts erratically, and sinks on the pause. A versatile lure that can be used for various species.
