ABOUT TOUGHFIA

TOUGHFIA is a sub brand by BONE Fishing World. Designed by Bone Lim of BONE Fishing World, each TOUGHFIA lure is designed meticulously and crafted ingeniously to replicate different species of fish with precision, and has been comprehensively tested and fine tuned to bring the best performance in various fields of lure fishing.

OFFGRID

5-PIECE TRAVEL ROD

FUJI ALCONITE GUIDE

REEL SEAT

REINFORCED JOINTS

HIGH PERFORMANCE CARBON FIBRE

FUJI ALCONITE

TOUGHCORE GRIP

The OFFGRID is a new range of 5 piece travel rods that are designed for ultimate portability. Constructed with 100% high performance carbon fibre material, each model has a medium-fast to fast action blank, complete with a sleek matte black finish. The 5 piece blank allows it to be packed down and stored in your backpack or luggage. Equipped with FUJI ALCONITE and a custom reel seat, the OFFGRID has a variety of lengths, ranging from 5'6" to 7'6", all with various ratings suitable for a wide range of lure fishing scenario.

YELLOWCHEEK JERK 70SS / 100SS

SUPERIOR JERK BAIT MINNOW

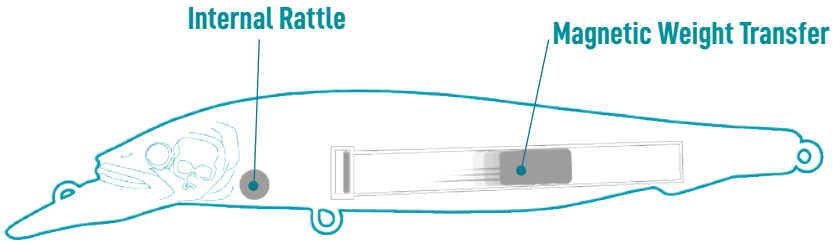

YCJ70SS LENGTH 70mm WEIGHT 6g TYPE SLOW SINKING DEPTH 0.5-1m HOOK #8 AVG. CASTING DISTANCE 40-50m

YCJ100SS LENGTH 100mm WEIGHT 12g TYPE SLOW SINKING DEPTH 0.8-1m HOOK #4 AVG. CASTING DISTANCE 44-65m

The Toughfia Yellowcheek Jerk is a slim profiled jerk bait minnow. Constructed with reinforced ABS plastic and internally fitted with a magnetic weight transfer system for maximum casting distance. It has a single ball bearing in the front chamber which produces a rattling noise when the minnow is retrieved. Work it with a simple straight retrieve to impart a tight wobbling action, or a jerk and pause retrieve for a erratic darting action. Pause the retrieve to allow the Yellowcheek Jerk to sink slowly!

ACTION

- Straight Retrieve: Wobble & Roll
- Jerking Retrieve: Erratic Darting
- Slow Sinking On The Pause

YELLOWCHEEK PENCIL 80S

EFFECTIVE IN VARIOUS TARGETS IN DIFFERENT SITUATIONS

YCP80S LENGTH **80mm** WEIGHT **14g** TYPE **SINKING** DEPTH **VARIABLE** HOOK **#6** AVG. CASTING DISTANCE **55-75m**

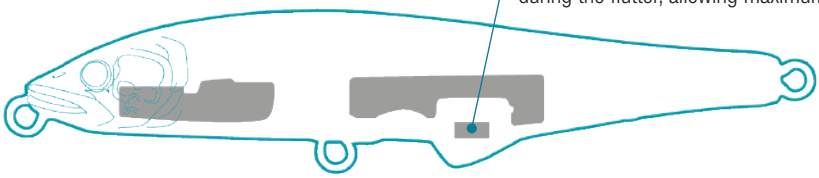

The Toughfia Yellowcheek Pencil is a slim profiled sinking pencil that is constructed with reinforced ABS plastic and is strategically weighted for maximum casting distance. The key feature of the lure is its magnetic hook slot, which allows the angler to work the sinking pencil in any speed or fashion without foul hooking onto the mainline, especially when it flutters on the drop. Work it with a straight retrieval for a seductive side to side wobble, or with fast twitches throughout the water column. Pause the lure on the sink to trigger bites, as this allows a seductive flutter on the fall.

ACTION

- Straight Retrieve: S-wave Side To Side Wobble
- Twitching Retrieve: Erratic Darting
- Fluttering On The Sink

Magnetic Hook Slot Prevents Line Foul On The Sink!!!

Hook will stay in place when working the lure at any speed and during the flutter, allowing maximum hook up rate!

SKYGAZER MINNOW 60S

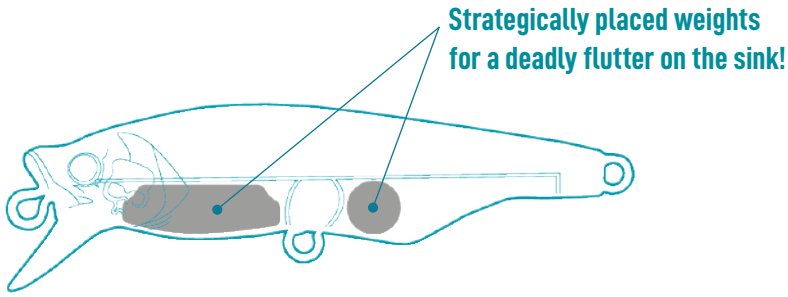

SUPERIOR SINKING MINNOW EFFECTIVE IN VARIOUS TERRAIN

SGZ60S LENGTH **60mm** WEIGHT **8g** TYPE **SINKING** DEPTH **VARIABLE** HOOK **#10** AVG. CASTING DISTANCE **40-55m**

The Toughfia Skygazer Minnow is a versatile sinking minnow that is constructed with reinforced ABS plastic, designed to be worked in various columns of the water. With its small profile of 60mm, it has a crazy wobble on a straight retrieve and a deadly fluttering action on the sink. It is perfect when worked with a twitching retrieve coupled with pauses, enabling the deadly flutter to attract fish on the drop. Suitable for multi species and in various terrain.

ACTION

- Straight Retrieve: Wide Wobble
- Twitch & Pause Retrieve: Erratic Darting
- Fluttering on the sink

SEABASS MINNOW 110F / 125F

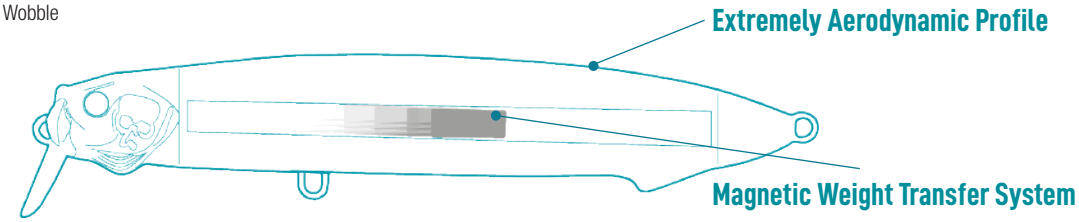

SEARCH OUT THE SEABASS

SBS110F	LENGTH **110mm**	WEIGHT **17g**	TYPE **FLOATING**	DEPTH **0.5-1m**	HOOK **#4**	AVG. CASTING DISTANCE **45-55m**
SBS125F	LENGTH **125mm**	WEIGHT **25g**	TYPE **FLOATING**	DEPTH **0.5-1m**	HOOK **#4**	AVG. CASTING DISTANCE **45-55m**

The TOUGHFIA Seabass Minnow is a minnow designed for long distance casting, perfect for shore based scenarios. Constructed with ABS plastic material for a better durability, the Seabass minnow's extremely aerodynamic slim profile, coupled with its internal magnetic weight transfer system allows for a great casting distance, with an average casting of 45-55m. The Seabass Minnow has a classic wide wobble and roll on a straight retrieve that Seabass cannot resist. And whether you are casting into open water covering grounds, or into the current flow, the key feature of the Seabass Minnow is the ability to wobble even on an ultra slow retrieve. A faster constant retrieve allows the lure to remain in control with its super stable wobble underwater. Twitch the minnow to dart it, and after which, a pause will allow it to float back to the surface. Absolutely a lure to have in the tackle box for shore based scenarios.

ACTION

- Straight Retrieve: Rolling & Wide Wobble
- Slow Floating on the pause

SNAKEHEAD PENCIL 110F / 135F

EXTREME CASTING DISTANCE

SNHP110F LENGTH 110mm WEIGHT 18g TYPE FLOATING DEPTH TOP WATER HOOK #4 AVG. CASTING DISTANCE 40-60m

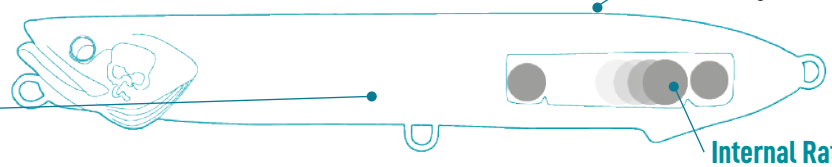

SNHP135F LENGTH 135mm WEIGHT 29g TYPE FLOATING DEPTH TOP WATER HOOK #2 AVG. CASTING DISTANCE 50-80m

The TOUGHFIA Snakehead Pencil was developed with the idea of reaching previously unattainable distances. Constructed with reinforced ABS plastic, its super rear-weighted design and aerodynamic long slim body allows an insane casting distance that is unmatched. Internally, it features a single ball-bearing chamber that emits loud knocks and clacks when the lure is worked. Work it with a slow walk the dog motion or a simple fast retrieve on the surface depending on your target species or fishing situation! Be it from shore or boat, the Snakehead Pencil is definitely an effective topwater pencil in both fresh and salt water!

ACTION

- Easy walk the dog with loud clacking rattle
- Fast straight retrieve creating an erratic surface commotion

Aerodynamic Profile
An extreme aerodynamic profile provides unparelleled casting distance

ABS MATERIAL
Constructed with ABS plastic for increased durability

Internal Rattle
A chamber that provides a loud clack each time the lure is worked, attracting attention to the surface

PAPUAN BASS SWIM JERK 80SS

LIPLESS SWIMMING MAGIC

PBSJ80SS LENGTH **80mm** WEIGHT **14g** TYPE **SLOW SINKING** DEPTH **0.5-1m** HOOK **#4** AVG. CASTING DISTANCE **50-60m**

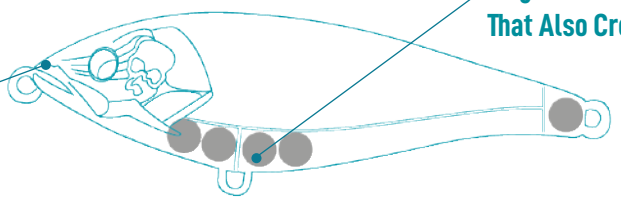

The TOUGHFIA PAPUAN BASS SWIM JERK is a slow sinking bib-less swimming jerk bait. Constructed with reinforced ABS plastic and internally fitted with a magnetic weight transfer system. Internally, the ball bearing chamber holds two ball bearings which act as a weight transfer system and and produces a subtle knocking noise when the lure is worked. With its strategically balanced structure, it is able to achieve a great casting distance. Work it with a simple straight retrieve to impart a side to side wobble that entices even the most finickiest of fish, or a twitching retrieve for a more erratic approach that imparts a irregular darting motion. A slow sinking lure by nature, it allows anglers to fish it in shallower waters if required.

ACTION

- Straight Retrieve: Wobble & Roll
- Jerking Retrieve: Erratic Darting
- Slow Sinking On The Pause

PAIMA SPOT WALK

WALK ON THE SPOT

PSW80F LENGTH **80mm** WEIGHT **21g** TYPE **TOP WATER** HOOK **#4** AVG. CASTING DISTANCE **45-60m**

The TOUGHFIA PAIMA SPOT WALK is a broad profiled topwater lure that has a unique “on the spot” dog walking action. With a fast twitching retrieve, the PAIMA SPOT WALK pivots on the spot from side to side, allowing fish to strike with better accuracy. Built with tough ABS plastic material, it features an internal chamber filled with multiple ball bearings which emit a loud rattle during retrieval. At 21g in weight and 80mm in length, the PAIMA SPOT WALK is able to get a good casting distance on medium to heavy tackle and its 80mm profile makes it bite sized for most fishes!

KINGMACK JERK 100SS / 120SS

LIPLESS SWIMMING MAGIC

KMJ100SS LENGTH **100mm** WEIGHT **23g** TYPE **SLOW SINKING** DEPTH **0.5-1m** HOOK **#2** AVG. CASTING DISTANCE **50-70m**

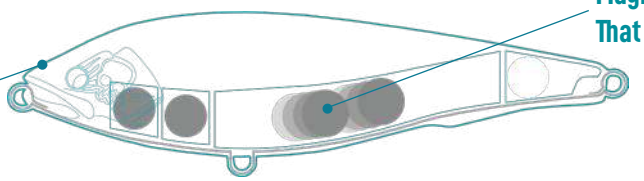

KMJ120SS LENGTH **120mm** WEIGHT **39g** TYPE **SLOW SINKING** DEPTH **0.5-1.2m** HOOK **#1** AVG. CASTING DISTANCE **50-80m**

The TOUGHFIA KINGMACK SWIM JERK is a slow sinking bib-less swimming jerk bait. Constructed with 100% reinforced ABS plastic which increases durability of overall performance. It is internally fitted with a magnetic weight transfer system which greatly increases cast distance as well as wire-through hook hanger that prevents pulled eyelets. Internally, the ball bearing chamber holds two ball bearings which act as a weight transfer system and produces a subtle knocking noise when the lure is worked. With its strategically balanced structure, it is able to achieve a great casting distance. Work it with a simple straight retrieve to impart a side to side wobble, a twitching retrieve for a more erratic approach that imparts an irregular darting motion, or long sweeps and a pause to allow the lure to sink slowly, giving the fish adequate time on the strike. With its bigger profile, it is suitable for use in offshore casting for Bluewater pelagic or in freshwater for fish like Pike or Giant Snakehead.

ACTION

- Straight Retrieve: Side To Side Wobble
- Twitching Retrieve: Erratic Darting
- Slow Sinking On The Pause

Streamlined Body Shape Provides Maximum Casting Distance

Magnetic Weight Transfer Bearing That Also Creates An Internal Rattle

PBSD100D	LENGTH	100mm	WEIGHT	48g	TYPE	FLOATING	DEPTH	8-12m	HOOK	#1/0	AVG. CASTING DISTANCE 50-70m

The TOUGHFIA Papuan Bass Diver is a hybrid of a flat crank and round bib crank-bait that is unique in action and is fast diving. Constructed with 100% reinforced ABS plastic which increases durability of overall performance. It is internally fitted with a magnetic weight transfer system which greatly increases cast distance as well as wire-through hook hanger that prevents pulled eyelets. The internal ball bearings provide a higher pitched rattle when the lure is worked. The unique feature of the hybrid flat / round bib crank bait of the Papuan Bass Diver is that with its unique broad yet long profile, it casts extremely well and provides high stability when worked in high current or faster retrieves. It dives quickly to its max depth depending on the size, and Its quick float time prevents snag ups.

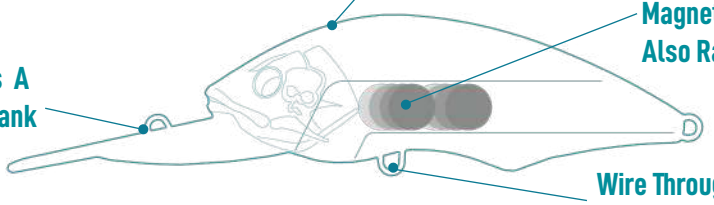

ACTION

- Straight Retrieve: Tight And Stable Wobble
- Fast Diving
- High Stability, Extreme Casting Distance

Constructed With ABS Plastic For Increased Durability

Magnetic Weight Transfer Ball Bearing Also Rattle When The Lure Is Worked

Hybrid Flat/Round Bib Produces A High Stable Wobbling On The Crank

GT SWIMMER 150S

MESMERIZING SWIMMING ACTION

GTS150S LENGTH **150mm** WEIGHT **105g** TYPE **SLOW SINKING** DEPTH **VARIOUS** HOOK **#2/0** AVG. CASTING DISTANCE **60-90m**

The TOUGHFIA GT Swimmer is a slow sinking swimbait designed for use in bluewater casting scenario. Constructed with reinforced heavy duty ABS plastic and wire through hook hangers to provide excellent durability. When casting, the GT Swimmer features an internally fitted tungsten ball that has a weight transfer chamber, maximising the distance effortlessly. As the lure is worked, the tungsten ball slides back into the bottom chamber providng a lower center of gravity which increases the fluidity of the action. A wide side to side high stability wobbling is produced on a straight retrieve. Varying retrieval speeds depending on target species. A long sweep and pause allows the GT Swimmer to swim erratically and a sudden pause allows it to sink slowly like an injured baitfish. Constant twitching produces a slower side to side sliding action which can be effective in pressured water.

ACTION

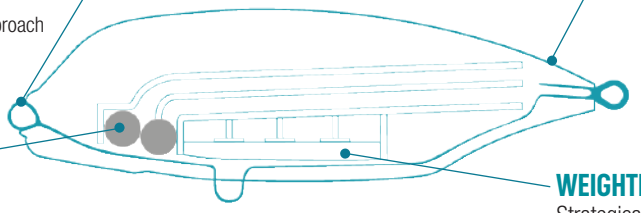

- Wide side to side wobble on a straight retrieve
- Long sweep and pause for a erratic action and slow sinking on the pause
- Constant twitching for a slower side to side approach

WIRE THROUGH HOOK HANGERS

Wire through hook hangers provide maximum durability and holds on to the toughest fish

HEAVY DUTY ABS MATERIAL

Heavy duty ABS plastic provides maximum resilience against the strongest species

TUNGSTEN WEIGHT TRANSFER SYSTEM

Internally equipped with tungsten ball to assist in casting and balance on the action

WEIGHTED BOTTOM

Strategically placed weights ensures the perfect swimming action

BARRA JERK 90SP MD

MID-DIVING SUSPENDING JERK BAIT

BJMD90 LENGTH **90mm** WEIGHT **23g** TYPE **SUSPENDING** DEPTH **3m** HOOK **#1** AVG. CASTING DISTANCE **50-60m**

The TOUGHFIA BARRA JERK 90SP MD is a mid-diving suspending jerkbait, and is designed with a flat profile. This provides the jerkbait with a stable wide slapping wobble, coupled with a slight rolling action. Ripping the BARRA JERK 90SP MD imparts an irregular side to side darting action. Constructed with 100% reinforced ABS plastic material and wire through hook hangers, the BARRA JERK 90SP MD is optimised to suspend on the pause, maintaining its position in the bite zone. Designed as a silent type jerkbait, it shines when a more subtle approach is needed. A perfect option for species like Barramundi, Mangrove Jack, Bass, and other similar species!

ACTION

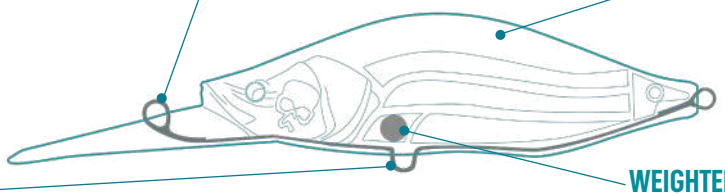

- Straight retrieve: slapping wobble and roll action
- Rip and pause: irregular side to side darting action
- Dives to 3m, suspends on the pause
- Silent

WIRE THROUGH HOOK HANGERS

Wire through hook hangers provide maximum durability and holds on to the toughest fish

HEAVY DUTY ABS MATERIAL

Heavy duty ABS plastic provides maximum resilience against the strongest species

OVERSIZED HOOKS

Oversized hooks to balance out the suspend under water, and at the same time provide increased holding power

WEIGHTED BOTTOM

Strategically placed weights ensures the perfect swimming action, while keeping it silent

MACK MINNOW 115HS

HEAVY SINKING MINNOW

MMHS115 LENGTH **115mm** WEIGHT **51g** TYPE **HEAVY SINKING** DEPTH **VARIABLE** HOOK **#1** AVG. CASTING DISTANCE **50-80m**

The TOUGHFIA MACK MINNOW 115HS is a heavy sinking minnow designed to cover ground with its aerodynamic long cast design and easy usability. Constructed with 100% reinforced ABS plastic material, it is strategically weighted internally to sink in a backwards fashion. This feature allows more ground coverage as it was designed for open water casting. At 51g in weight, the MACK MINNOW HS easily acquires distances on the cast and gets down to the required depth in quick time. The super tuned bib provides a wide frantic wobble on a straight retrieve, maintaining its depth as much as possible, and also provides reduced resistance on faster retrieves. Equipped with wire through hook hangers that prevent pulled eyelets, the MACK MINNOW HS can be used in various saltwater casting scenario. From offshore open water or reef casting, to shore based casting, the MACK MINNOW HS shines especially when targeting pelagic species.

ACTION

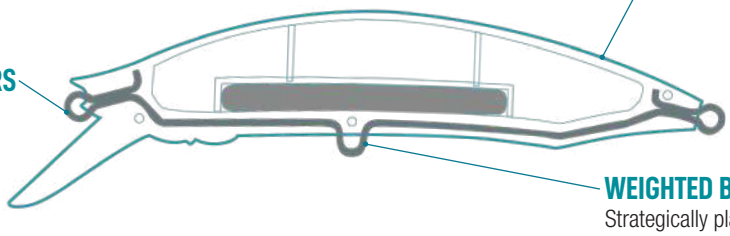

- Straight retrieve: Wide frantic wobble
- High stability with reduced resistance on fast retrieves
- Clicking rattle when lure is worked

HEAVY DUTY ABS MATERIAL

Heavy duty ABS plastic provides maximum resilience against the strongest species

WIRE THROUGH HOOK HANGERS

Wire through hook hangers provide maximum durability and holds on to the toughest fish

YELLOWCHEEK LONG CAST 150F

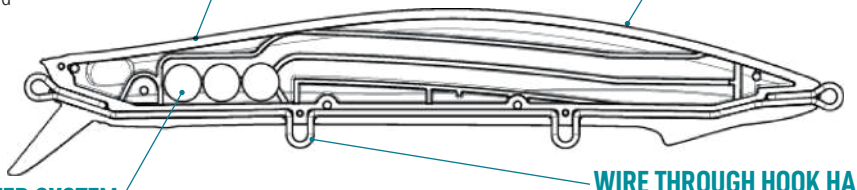

SUPER LONG CAST MINNOW

YCLC150F LENGTH 150mm WEIGHT 29g TYPE FLOATING DEPTH 2-2.5m HOOK #4 AVG. CASTING DISTANCE 50-80m

The TOUGHFIA YELLOWCHEEK LONG CAST 150F is a long profile minnow with an aerodynamic body, designed to cover more ground with its super long casting ability. Constructed with heavy duty ABS plastic and wire-through hook hangers, the YELLOWCHEEK LONG CAST delivers a wide wobble and roll action on a straight retrieve, diving down to a range of 2–2.5m depending on retrieval speed. Work it with a simple straight retrieve, or add a jerking twitch motion to create a more erratic darting action. Pausing the retrieve allows the lure to float, giving anglers more control throughout the presentation. Effective for shore-based scenarios such as casting in the surf, estuary, and freshwater game, targeting various species including Seabass, Giant Snakehead, Yellowcheek Carp, pelagic species, and more.

FEATURES

- Aerodynamic profile for super long casting ability
- Wide wobble and roll action on a straight retrieve
- Cast weight transfer system
- Made with heavy duty ABS plastic and wire-through hook hangers

A ERODYNAMIC PROFILE

Streamlined body that allows the minnow to cast a mile easily

ABS MATERIAL

Constructed with ABS plastic for maximum durability

CAST WEIGHT TRANSFER SYSTEM

Triple ball bearings that aid the increased casting distance, transferring to the rear, and adding subtle rattle when worked

YELLOWCHEEK LONG CAST 150SF

SHALLOW SUPER LONG CAST MINNOW

YCLC150SF LENGTH 150mm WEIGHT 29g TYPE FLOATING DEPTH 0.5m HOOK #4 AVG. CASTING DISTANCE 50-80m

The YELLOWCHEEK LONG CAST 150SF is a long-profile shallow-running minnow with an aerodynamic body, designed to cover more ground with its super long-casting ability. Constructed with heavy-duty ABS plastic and wire-through hook hangers, the YELLOWCHEEK LONG CAST 150SF delivers a wide wobble and roll action on a straight retrieve while swimming approximately 0.5m below the surface. This makes it ideal for working over shallow flats, submerged structures, weed beds, estuaries, surf zones, and other areas where a deeper-diving lure may be less suitable. Work it with a simple straight retrieve, or add a jerking twitch motion to create a more erratic darting action. Pausing the retrieve allows the lure to float, giving anglers greater control throughout the presentation. Effective for shore-based and shallow-water applications, the YELLOWCHEEK LONG CAST 150SF is suitable for targeting species including Seabass, Giant Snakehead, Yellowcheek Carp, pelagic species, and more.

FEATURES

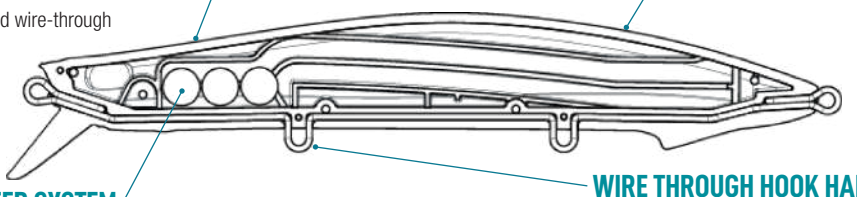

- Aerodynamic profile for super long casting ability
- Super shallow diving depth of 0.5m
- Wide wobble and roll action on a straight retrieve
- Cast weight transfer system
- Made with heavy duty ABS plastic and wire-through hook hangers

A ERODYNAMIC PROFILE

Streamlined body that allows the minnow to cast a mile easily

TUNA SWEEPER 150F

TSP150F LENGTH **150mm** WEIGHT **65g** TYPE **FLOATING** DEPTH **VARIABLE** HOOK **2/0 Trebles** AVG. CASTING DISTANCE **50-80m**

The TOUGHFIA Tuna Sweeper is a floating stickbait designed to produce a wide range of surface actions, from wide S-wobbles on a steady retrieve to erratic darts and sweeping glides on longer pulls.Designed with a raindrop-shaped profile, the Tuna Sweeper produces a wide, skittish swimming action that closely mimics a fleeing baitfish. With a slow floating buoyancy, long sweeps create a more lifelike escaping action, especially when paired with pauses to trigger reaction strikes. Shorter sweeps and sharp jerks bring out a more aggressive, darty action with added surface commotion, while the loud internal rattle helps draw attention from distance. Built with a rear-weighted body for improved casting performance, the Tuna Sweeper is constructed from heavy-duty ABS plastic and internally reinforced with full wire-through hook hangers for maximum durability.Highly effective for bluewater casting, especially with light popping gear, the TOUGHFIA Tuna Sweeper is built for tuna and other pelagic species that respond to fast, erratic surface presentations.

TEARDROP PROFILE ACTION

Teardrop-shaped body helps create a skittish fleeing baitfish action with long sweeps, short jerks, and pauses with the wide S-Wobble Action Floating stickbait designed to produce wide surface movement, erratic darts, and sweeping glides.

HEAVY DUTY CONSTRUCTION

Heavy-duty ABS body with full wire-through hook hangers and 2/0 trebles for added strength and durability.

SUPER LONG CASTING PERFORMANCE

Rear-weighted body improves casting distance and balance for bluewater casting.
